

SUMMIT STRUCTURAL INSULATED STEEL PANELS

Artspan® structural insulated steel panels set the standard of excellence in the insulated metal panel market. Our proprietary and innovative panels provide structural building envelope solutions for a wide range of structures, in a variety of different industries.

Typical Panel

Typical Corner Panel

TECHNICAL SPECS

Coverage Width - 36" (1,067mm)

Thickness - 5" (127mm)

Panel Lengths - 4' - 54' (1219mm to 16,154mm)

Foam Core - Polyisocyanurate (minimum density of 2.5 lbs/cu.ft)

Effective R-Value - 28.5 (tested in accordance with ASTM C518)

Exterior Face - 24 ga light corrugated pre-painted Grade 33 steel (conforms to ASTM A792), Z275 or AZM150 finish, embossed texture

Interior Face - 24ga deep corrugated pre-painted Grade 33 Steel (conforms to ASTM A792), Z972 or AZM150 finish

Weight - 9.94 lbs/lineal foot or 3.31 lbs/sq.ft. (based on 24 ga exterior/interior face)

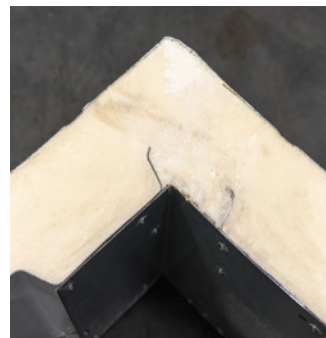

Fire Rating Test Result - 51 minutes (CAN/ULC S101 test)

Flame Spread Rating (tested in accordance with CAN/ULC S102-10) - 10

Smoke Developed Classification (tested in accordance with CAN/ULC S102-10) 215

STC rating – 26 (tested according to ASTM E90 standard)

Structural load tables available upon request

Portions of this product may be covered by one or more U.S. or Canadian patents and/or pending patent applications.

ADVANTAGES

Mold and fire resistant

Panels can be pre-cut to desired lengths, pitch, reducing or eliminating site cutting

Patented building system

Foam-to-foam bond with sealant provides outstanding building air tightness

Patented building system and one-piece corners

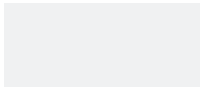

Easy to assemble, one-pass construction

Structural design can reduce or eliminate the need for secondary framing

AVAILABLE COLOURS

STANDARD EXTERIOR COLOURS

WHITEWHITE

STONE GREY
